

Opportunità commerciale India 2

Testo	Enhanced Wapp Systems (India) Private Limited: To initiate business relationship between Enhanced Wapp Systems (I) Pvt. Ltd & Companies in Italy working in Field of Water & Waste Water Management, GIS, Solid Waste Management, Water Resources Management, Lake Restoration. As we all know the Conventional fresh water sources(Ground water & surface water) now available in India as well as other part of world are barely sufficient to maintain the current & future demand of Population. Also the quality of ground & surface water is degrading day by day due to overexploitation & Poor management. Attempting to meet future regional demands by simply increasing withdrawals of surface and ground water will result in further unsustainable development, with depletion of freshwater resources and widespread environmental degradation. We need to urgently tackle the critical problem of water. Water has to be treated as a scarce resource, with a far stronger focus on managing demand. By doing collaboration with the technology providers, we can make clean water available to the Indian Population Specially to Rural & Urban Pooors.
