It is important to us that the manufacturers will be suppliers who have already worked with Israel. Steel structures - constructions made of rods and beams, screws, plates, etc., which are connected or welded to each other according to an engineer's plan. The construction itself is designed by a building/construction engineer, who should be able to provide us with a 3-dimensional plan that we can provide to the engineer of the steel structures factory. The rods, beams, screws, etc. are then all provided according to these plans and shipped in containers. Potential Partners Manufacturers and suppliers of steel structures according to the above detailed requirements. Target Countries: Italy
